KMS TECHNOLOGIES TEAM ADDS SENIOR EM EXPERTS

March 1, 2016 – Houston, TX KMS Technologies – KJT Enterprises has added Dr. Sofia Davydycheva and Dr. Maxim Smirnov to their team for rolling out a propriety microseismic and electromagnetic reservoir monitoring system. The system utilizes patented technology to provide customers the ability to visualize real time fluid changes in a reservoir.

Dr. Davydycheva is well known for her world class 3D modeling, well proven for borehole, land and marine applications. She will work on a novel borehole tool for the KMS reservoir monitoring system. Dr. Smirnov is one of the leaders in EM data processing and interpretation and he will support the first EM/microseismic permanent monitoring installation in Asia. Both will be partners in KMS-KJT.

About KMS Technologies:

Formed in 1999, KMS is an award-winning company based in Houston, Texas. The company is focused on integrating electromagnetics with other methods for onshore, offshore, and borehole applications.

KMS Technologies has pioneered technologies for geosteering, mud logging, marine electromagnetics, and land electromagnetics and holds over 30 US patents with wide geographic coverage.
