KMS TECHNOLOGIES LAUNCHES NEW MT INVERSION SERVICES

July 21, 2020 – Houston, TX KMS Technologies – KJT Enterprises Inc. has launched their new MT inversion services for 1D, 2D and 3D. The services are provided by our team of experts as result of the growing demand from customers who are already familiar with KMS' acquisition equipment.

The MT services are another piece to KMS' innovative acquisition system which uses real-time cloud enable transfer of data and processing. Now, our customers will also have the opportunity to get quick turn-around inversion results from our team of experts located all around the world.

Customers will also be able to purchase the MT inversion software through the bundle options offered with the KMS-200 software.

About KMS Technologies:

Formed in 1999, KMS is an award-winning company based in Houston, Texas. The company is focused on integrating electromagnetics with other methods for onshore, offshore, and borehole applications. KMS has been providing technology and services for more than 20 years on all continents. KMS Technologies has pioneered technologies for geosteering, mud logging, marine electromagnetics, and land electromagnetics and holds over 30 US patents with wide geographic coverage.
